

GAS POWERED JETTER

w/ Toolbox Enclosure

This unit is a very versatile machine and very easy to install. Supplied with a powerful Robins gas engine and a 3000psi rating, the package will do an excellent job with all household lines or grease traps. Grease pumpers find this jetter to be sufficient to provide routine flushing and jetting needs on routine grease trap servicing. The unit only uses 5gpm, allowing its water supply to come from most household faucets.
